Hi Edrick,

We use Prime faces for Web, Hibernate-JPA as ORM, Active MQ for messaging and Oracle database for storage.

Hi Mukesh,
        Which is the stack for the current implementations you guys have on the already deployed solutions. The one you showed us at the meeting.

    On Mar 12, 2018, at 3:34 PM, Mukesh Diwan <mdiwan@GCOMSoft.com> wrote:

    Hi Edrick/Mike,

        We have gone through the technology stack proposed. Please see our response.

    1. GCOM thinks OSMS needs following modules addition to core modules. Please let us
        know, if any additional modules you would like to add.
            a. Spring MVC
            b. Spring DAO/ORM
            c. Spring Boot
            d. Spring Integration
            e. Spring Security
            f. Spring Web services

2. GCOM is fine with either of Apache Camel & Active MQ or Apache Kafka.
3. GCOM is fine with Java 1.8 and MySQL database.

Addition to above, GCOM suggests below tools/server:
4. Apache Http Server
5. Eclipse IDE (Oxygen version) for development
6. Junit for unit test
7. Maven for build management
8. Jenkins for continuous integration
9. Sonar for code quality

Thanx n Regards,

Mukesh...

Subject: FW: comments about project and tech specs

Thanks, Edrick. Looks like some good information. I added the other technical team members to the email so they can comment as well. Team, let me know if you want me to set up a conference call so that we can discuss.

Subject: comments about project and tech specs

Hi Mike,
     I've written a few thoughts on the technical aspects of the project from my perspective. Please let me know any comments about it
.
